CLUB ACTIVITY 2023-24

Dear Parent

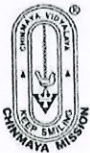

Hari Om!

The school focuses on the holistic development of the learners, where scholastic and co-scholastic learning experience are considered equally significant. Keeping this in mind, the school is organising club activities for classes IV and V on first and third Saturday of every month. The club activities not only help learners in fostering their inherent talent, but also provide a platform for learning to work in a team and to learn essential life skills. The various clubs are:

1. Cookery-The club aims at enhancing the culinary skills of the learners by teaching them the recipes and presentation of delicious food items. The little chefs enjoy cooking yummilicious food items. So follow the aroma to relish the fireless dishes.
2. Personality Development – The club endeavours to mould the learners in such a way so that they develop self-esteem, confidence and also learn the skill of public speaking.
3. Vedic Mathematics- The club aims at enhancing the computation skills and developing logical reasoning and problem-solving ability of the learners.
4. Financial Literacy – This club aims to teach the young learners’ valuable skills about budgeting, saving, credit and various other essential financial processes.
5. Dramatics – The club provides a platform to promote communication skills of learners and helps in developing team work, ability to speak fluently and emote before an audience and imbibe a sense of confidence.
6. Eco Warriors- The club aims to promote sustainable practices and environmental awareness through different activities.
7. Computer Club-The club helps the learners to enhance their skills in programming and designing. It inculcates the logical and analytical thinking among the learners.

Please note: Club allocation will be subject to the number of students choosing the activity.
